

# StudioDesigner

- visualizes information in additional web panels in SuperOffice CRM!

With Studio**D**esigner you can design your own forms with *dashboards, scorecards, info-screens, debtor details, ERP invoices* or any other information from any external data source.

The Studio**D**esigner forms are displayed in SuperOffice CRM in a *web panel* or separately in its own window.

Use elements like *charts, lists, grids, tabs, text boxes, labels, links, images* and more to visualize your corporate goals and track performance towards them – displayed directly in the SuperOffice CRM.

Visualize data from SuperOffice CRM or connect to other databases like your ERP system, business data suppliers, Excel sheets, etc.

Design your own forms with Studio**D**esigner or let your CRM reseller assist you.

Studio**D**esigner helps you turn your CRM strategies into action!

## What do I get?

- Easy-to-use Form Designer helps you build and design your own forms
- Connectivity to most data sources like SQL, XML, csv/txt files, web services, OleDb to be displayed in your forms
- Use components like *grids, charts, drop-down lists, images, links, labels* etc. to build the form you need
- Build dashboards to emphasize important sales, pipeline and target figures visually

## Basic requirements

- SuperOffice CRM 6.1+
- Windows Server 2000, 2003, 2008
- IIS 5,6 or 7
- .NET Framework 2.0
